

Tesla Vehicle Return Checklist

Use this checklist to keep track of your lease-end tasks before returning your vehicle to a Tesla location.

Consider requesting a quote

Keep in mind, the purchase estimate may not include charges for daily extension fees, unpaid summons, and taxes.

- Log in to your Ally account
- Go to **Payments** from your **Snapshot**, or **Manage Account** from your account details
- Choose **Request a Quote**

Excess mileage

- Refer to your lease agreement for the mileage you agreed to when you signed your contract
- Compare your current mileage to what's allowed on your lease contract
- If your odometer reading is higher, we may charge you for the excess

Excess wear

If your account is eligible, you'll receive an invitation to complete a self-inspection with our third-party provider. The self-inspection is optional but allows you to get an early look at what you may be charged if your vehicle has excessive wear prior to turn-in. After completing the inspection you'll receive an estimate of excess wear charges you may be liable for.

Plan your vehicle return

Schedule your vehicle drop off to a Tesla location using your Tesla app.

- Remember to bring your key cards
- Contact your state agency to determine if your state requires you to return your license plate at lease end

At the return location

Sign an odometer statement to document current mileage as required by federal law

After return

Review the letter we send detailing any remaining amounts you owe
